#### GUIDANCE FOR AUTHORS

Aims and Scope *Biodiversitas*, *Journal of Biological Diversity* or *Biodiversitas* encourages submission of manuscripts dealing with all aspects of biodiversity, including plants, animals, and microbes at the level of the gene, species, and ecosystem. Ethnobiology papers are also considered.

Article types The journal seeks original full-length: (i) Research papers, (ii) Reviews, and (iii) Short communications. Original research manuscripts are limited to 8,000 words (including tables and figures) or proportional to articles in this publication number. Review articles are also limited to 8,000 words, while Short communications should be less than 2,500 words, except for pre-study.

Submission: The journal only accepts online submissions through the open journal system (https://smujo.id/biodiv/about/submissions) or, for login problems, email the editors at unsjournals@gmail.com (or editors@smujo.id). Submitted manuscripts should be the original works of the author(s). Please ensure that the manuscript is submitted using the template, which can be found at (https://biodiversitas.mipa.uns.ac.id/D/template.doc). The manuscript must be accompanied by a cover letter containing the article title, the first name and last name of all the authors, and a paragraph describing the claimed novelty of the findings versus current knowledge. Please also provide a list of five potential reviewers in your cover letter. They should come from outside your institution and better from three different countries. Submission of a manuscript implies the submitted work has not been published (except as part of a thesis or report, or abstract) and is not being considered for publication elsewhere. When a group writes a manuscript, all authors should read and approve the final version of the submitted manuscript and its revision; and agree on the submission of manuscripts for this journal. All authors should have made substantial contributions to the concept and design of the research, acquisition of the data and its analysis, drafting the manuscript, and correcting the revision. All authors must be responsible for the work's quality, accuracy, and ethics.

**Ethics** Author(s) must be obedient to the law and/or ethics in treating the object of research and pay attention to the legality of material sources and intellectual property rights.

**Copyright** If the manuscript is accepted for publication, the author(s) still hold the copyright and retain publishing rights without restrictions. For the new invention, authors must manage its patent before publication.

**Open Access** The journal is committed to free-open access that does not charge readers or their institutions for access. Readers are entitled to read, download, copy, distribute, print, search, or link to the full texts of articles, as long as not for commercial purposes. The license type is CC-BY-NC-SA.

Acceptance Only articles written in US English are accepted for publication. Manuscripts will be reviewed by editors and invited reviewers (double-blind review) according to their disciplines. Authors will generally be notified of acceptance, rejection, or need for revision within 1 to 2 months of receipt. Manuscripts will be rejected if the content does not align with the journal scope, does not meet the standard quality, is in an inappropriate format, or contains complicated grammar, dishonesty (i.e., plagiarism, duplicate publications, fabrication of data, citations manipulation, etc.), or ignoring correspondence in three months. The primary criteria for publication are scientific quality and significance. Uncorrected proofs will be sent to the corresponding author by system or email as .doc or .docx files for checking and correcting typographical errors. The corrected proofs should be returned in 7 days to avoid publication delays. The accepted papers will be published online in chronological order at any time but printed at the end of each month.

A charge Authors are charged USD 400 (IDR 6,000,000). Additional charges may be billed for language improvement, USD 75-150 (IDR 1,000,000-2,000,000). Reprints The sample journal reprint is only available by special request. Additional copies may be purchased when ordering by email and sending back the uncorrected proofs.

Manuscript preparation Manuscript is typed on A4 (210x297 mm<sup>2</sup>) paper size, in a single column, single space, 10-point (10 pt) Times New Roman font. The margin text is 3 cm from the top, 2 cm from the bottom, and 1.8 cm from the left and right. Smaller lettering sizes can be applied in presenting tables and figures (9 pt). Word processing program or additional software can be used; however, it must be PC compatible, use the template, and be Microsoft Word based (.doc or .rtf; not .docx). Scientific names of species (incl. subspecies, variety, etc.) should be written in italics, except in italicized sentences. Scientific names (genus, species, author) and cultivar or strain should be mentioned completely for the first time mentioning it in the body text, especially for taxonomic manuscripts. The genus name can be shortened after the first mention, except in early sentences, or where this may generate confusion; name of the author can be eliminated after the first mention. For example, Rhizopus oryzae L. UICC 524 can be written hereinafter as R. oryzae UICC 524. Using trivial names should be avoided. Biochemical and chemical nomenclature should follow the order of the IUPAC-IUB. For DNA sequences, it is better to use Courier New font. Standard chemical abbreviations can be applied for common and clear used, for example, completely written butilic hydroxyl toluene (BHT) to be BHT hereinafter. Metric measurements should use IS denominations, and other systems should use equivalent values with the denomination of IS mentioned first. A dot should not follow abbreviations like g, mg, mL, etc. Minus index (m-2, L-1, h-1) suggested being used, except in things like "per-plant" or "per-plot." Mathematical equations can be written down in one column with text; in that case, they can be written separately. Numbers one to ten are written in words, except if it relates to measurement, while values above them are written in number, except in early sentences. The fraction should be expressed in decimal. In the text, it should be used "%" rather than "percent." Avoid expressing ideas with complicated sentences and verbiage/phrasing, and use efficient and effective sentences.

**The title** of the article should be written in compact, clear, and informative

sentence, preferably not more than 20 words. Name of author(s) should be completely written, especially for the first and the last name. Name and institution address should also be completely written with street name and number (location), postal code, telephone number, facsimile number, and email address. We choose local names in Bahasa Indonesia for universities in Indonesia. The mention of "strata" program, should be avoided. Manuscript written by a group, author for correspondence along with address is required (marked with """). The title page (first page) should include title of the article, full name(s), institution(s) and address(es) of the author(s); the corresponding authors detailed postage and e-mail addresses (P), and phone and fax numbers (O).

Abstract A concise abstract is required (about 200 words). The abstract should be informative and state briefly the aim of the research, the principal results and major conclusions. An abstract is often presented separately from the article, thus it must be able to stand alone (completely self-explanatory). References should not be cited, but if essential, then cite the author(s) and year(s). Abbreviations should be avoided, but if essential, they must be defined at their first mention. Keywords are about five words, covering scientific and local name (if any), research themes, and special methods used; and sorted from A to Z. Abbreviations (if any): All important abbreviations must be defined at their first mention there. Running title is about five words.

Introduction is about 600 words, covering the aims of the research and provide an adequate background, avoiding a detailed literature survey or a summary of the results. Materials and Methods should emphasize on the procedures and data analysis. Results and Discussion should be written as a series of connecting sentences, however, for a manuscript with long discussion should be divided into subtitles. Thorough discussion represents the causal effect mainly explains why and how the results of the research were taken place, and do not only re-express the mentioned results in the form of sentences. Concluding sentence should be given at the end of the discussion. Acknowledgements are expressed in a brief; all sources of institutional, private and corporate financial support for the work must be fully acknowledged, and any potential conflicts of interest are noted.

Figures and Tables of a maximum of three pages should be clearly presented. The title of a picture is written down below the picture, while the title of a table is written above the table. Colored figures can only be accepted if the information in the manuscript can lose without those images; the chart is preferred to use black and white images. The author could consign any picture or photo for the front cover, although it does not print in the manuscript. All images property of others should be mentioned the source. Author is suggested referring to Wikipedia for international boundaries and Google Earth for satellite imagery. If not specifically mentioned, it is assumed to refer to these sources. There is no appendix, all data or data analysis is incorporated into Results and Discussions. For broad data, it can be displayed on the website as a supplement.

References Preferably 80% of it comes from scientific journals published in the last 10 years. In the text, give the author names followed by the year of publication and arrange from oldest to newest and from A to Z; in citing an article written by two authors, both of them should be mentioned; however, for three and more authors only the first author is mentioned followed by et al. For example, Saharjo and Nurhayati (2006) or (Boonkerd 2003a, b, c; Sugiyarto 2004; El-Bana and Nijs 2005; Balagadde et al. 2008; Webb et al. 2008). Extent citation should be avoided, as shown with the word "cit." Reference to unpublished data and personal communication should not appear in the list but should be cited in the text only (e.g., Rifai MA 2007, pers. com. (personal communication); Setyawan AD 2007, unpublished data). In the reference list, the references should be listed in alphabetical order. Names of journals should be abbreviated. Always use the standard abbreviation of a journal's name according to the ISSN List of Title Word Abbreviations (www.issn.org/2-22661-LTWA-online.php). Please include DOI links for journal papers. The following examples are for guidance.

Vegetation composition, structure and association at site invaded by <i>Calliandra houstoniana</i> in Bung Hatta Grand Forest Park, West Sumatra, Indonesia SOLFIYENI, FERDINA WINATA, MILDAWATI, HANIFA MARISA	3608-3616
Diversity and nesting ecology of Indo-Malayan stingless bees (Hymenoptera: Apidae) in Aceh Province, Indonesia MUHAMMAD FARHAN PUTRA EMIL, WINDRA PRIAWANDIPUTRA, SIH KAHONO, TRI ATMOWIDI	3617-3627
The potential of cold plasma technology for weed control in the pre-growth and post-growth phases ANWAR BUKHORI, DWI GUNTORO, SUDRADJAT, ANTO TRI SUGIARTO	3628-3636
Exploration of cadmium-resistant bacteria in cadmium-contaminated rice fields in Karawang District, Indonesia NOVRIANTY RIZQI AZIS, YULIA NURAINI, CAHYO PRAYOGO, RIZKY MAULANA ISHAQ, NOIRUNGSEE NUTTAPOL	3637-3644

DNA have discussions dela Cala Consiste manuscriptoria Laboration Constitution of	2245 2252
DNA barcoding of medaka fish <i>Oryzias marmoratus</i> in Lake Towuti, South Sulawesi, Indonesia REZKI ASYA NUR, ANDI PARENRENGI, TUTY ARISURYANTI, HELMY WIDYASTUTI, IRMA ANDRIANI	3645-3652
A mid-Holocene pollen record of mangrove diversity on the coast of Ujung Genteng, the southern edge of Sunda Shelf, Indonesia SEPTRIONO HARI NUGROHO, YAN RIZAL, YAHDI ZAIM, EKO YULIANTO, PURNA SULASTYA PUTRA, AGUS MEN RIYANTO, AMAR	3653-3663
Mapping the potential of parasitoid species for biological control of <i>Spodoptera frugiperda</i> in Bali, Indonesia I NYOMAN GEDE USTRIYANA, I WAYAN SUPARTHA, I WAYAN SUSILA, KETUT AYU YULIADHI, I PUTU SUDIARTA, ANIS SYAHIRAH BINTI MOKHTAR, SYARI BIN JAMIAN, BINTAN MUTIAH, I WAYAN SANDIKA YASA, I WAYAN EKA KARYA UTAMA, I KADEK WISMA YUDHA	3664-3671
Analysis of environmental parameters supporting the abundance of Acanthaster planci in the Wakatobi and Sombori Marine Protected Areas, Sulawesi, Indonesia AFIFAH F JANSIT, NEVIATY PUTRI ZAMAN, BEGINER SUBHAN, RITA RACHMAWATI, LALANG	3672-3682
Species composition and size distribution of fishes in mangrove ecosystems in Kendari and Staring Bays, Southeast Sulawesi, Indonesia LATIFA FEKRI, KANGKUSO ANALUDDIN, YUSNAINI, HASAN ELDIN ADIMU, ANDI CHADIJAH	3683-3692
In vitro evaluation of synbiotics combinations of different inulin concentrations and multi-strains probiotics based on microbial growth and digestive enzymes production AYMAN ALAMEEN MOHAMMED, SITI ASLAMYAH, ZAINUDDIN, MUHAMMAD IQBAL DJAWAD	3693-3702
Vegetation condition and tourism suitability of natural mangrove in Bagek Kembar, Lombok, Indonesia GITO HADIPRAYITNO, I WAYAN SUANA, DIDIK SANTOSO, LALU JAPA, ENI SUYANTRI, GDE CAHYADI WIRAJAGAT, MUHAMMAD SYAZALI, MOHAMMAD LIWA ILHAMDI, RIZKY REGINA KAWIRIAN	3703-3711
Characterization of four varieties of <i>Prunus</i> L. from the Northern Iraq region via phytochemical analysis using the GC-MS technique NOOR AL-TALAB, SHAYMAA M. HISHAM, RAGHAD M. ABDULLA	3712-3719
Identification of 16S rRNA genes in bacteriocin-producing bacteria SUKMAWATI SUKMAWATI, SIPRIYADI, FEBRIANTI ROSALINA RATNA NURUL KUSUMA DEWI, MOHD IHWAN BIN ZAKARIAH	3720-3727
Diversity and distribution trends of bats along elevation and habitat gradients in Mount Tuminungan, Bukidnon, Philippines JOE MERFURT N. LAMA, ELBERT B. CABALLERO, JUSTIN N. MACEDA, JUNEL E. OMANDAM, EDDIE P. MONDEJAR,	3728-3738
Histological description of hepatopancreas in spiny lobster ( <i>Panulirus penicillatus</i> ) and bamboo lobster ( <i>Panulirus versicolor</i> ) in Sabang Waters, Aceh, Indonesia MUHAMMADAR ABDULLAH ABBAS, MUHAMMAD IQBAL, FIRDUS FIRDUS, WIDYA SARI, DEDI FAZRIANSYAH PUTRA	3739-3749
Growth performance and starch yield potential of Arrowroot ( <i>Maranta arundinacea</i> ) from various locations in Thailand SUPAPORN IEAMKHENG, SOMTOP SANTIBENCHAKUL, SUPATTRA POONPAERDCHON, BUNNY SOEM, NAJJAPAK SOOKSAWAT	3750-3757
Influencing the environmental factors on the abundance of puerulus <i>Panulirus homarus</i> in the Mentawai Islands, West Sumatra, Indonesia SUPARNO, YUSRA, AMELIA SRIWAHYUNI LUBIS, AIDY FITRI YUSEN VIZA	3758-3767

First record of <i>Onuphis eremita</i> (Onuphidae: Annelida) from Buntal Beach, Sarawak, Malaysia	3768-3774
FATIMAH A'TIRAH MOHAMAD, AIMAN AMANINA AMRAN	
Characterization of endophytic bacterial isolates from oil palm ( <i>Elaeis guineensis</i> Jacq.) seedlings and ramets for their plant growth promoting potential IDA AYU PUTU SURYANTI, MARIA INDAH PURNAMASARI, CAHYA PRIHATNA, IMAN RUSMANA, ARIS TRI WAHYUDI, ANTONIUS SUWANTO	3775-3788
Genetic diversity and phylogenetic reconstruction of Horseshoe crabs from East Java, Indonesia based on DNA barcode COI DWI ANGGOROWATI RAHAYU, RENI AMBARWATI, ULFI FAIZAH, ENDIK DENI NUGROHO, RUSDIANTO, PURITY SABILA AJININGRUM, NOORHIDAYAH BINTI MAMAT	3789-3802
Bioprospecting of non-timber forest products of selected flora in Baluran National Park, East Java, Indonesia for phytochemicals, anti-diabetic, anti-tyrosinase, and antioxidants RICO RAMADHAN, NI'MATUZAHROH, DINDA AYU LESTARI, NOVA ALFIAN HARIYANTO, SUHARTINI SUWANDARI, IRMAYANTI TRI KURNIA, PREECHA PHUWAPRAISIRISAN, MUHAMMAD IQBAL HASAN, KIETTIPUM PHONTREE, JOHAN SETIAWAN, SALAMUN, NANANG DWI WAHONO, AGUS SUPRIYANTO, MOCH. AFFANDI	3803-3815
The metabolomic fingerprinting of four <i>duku (Lansium domesticum</i> ) cultivars from Central Java, Indonesia based on unique metabolites and prospects for future breeding ENDANG DEWI MURRINIE, FAZAT FAIRUZIA, NINDYA ARINI, HENY ALPANDARI, INGGIT MAHARANI	3816-3839
Primer design of the CO1 gene (Cytochrome Oxidase-1) for Sumatran elephant ( <i>Elephas maximus sumatranus</i> ) for rapid detection using real-time PCR method MAQQITA TUNJUNG SARI, ARI SUSILOWATI, SETIA BETARIA ARITONANG, OKID PARAMA ASTIRIN, NITA ETIKAWATI, VIRA SAAMIA	3840-3849
Characteristics of six cherry tomato genotypes as genetic material for plant breeding programs ANUNG WAHYUDI, NURMAN ABDUL HAKIM, MICHO SANDEKA RACHMAN	3850-3859
Characterization of Bean Common Mosaic Virus (BCMV) strain Peanut Stripe Virus (PStV) associated with patchouli mottle disease in Indonesia SEDYO HARTONO, ARGAWI KANDITO	3860-3867
Isolation and identification of salt-tolerant, phosphorus-solubilizing bacterial strains from rice soil in rice-shrimp farming systems in Tien Giang Province, Vietnam TRUONG QUOC TAT	3868-3875
Physicochemical and microbiological properties of fermented milk using lactic acid bacteria isolated from dangke SETIAWAN PUTRA SYAH, ANDI NURUL MUKHLISAH, WENY DWI NINGTIYAS, MUHAMMAD IRFAN, NASRIA ANANDA, ANNISA AMALIA, TASMIN	3876-3883
Diversity of flora and fauna in various forest ecosystem types of South Sorong District, Southwest Papua Province, Indonesia OBED N. LENSE, JIMMY F. WANMA, FRANCINA F. KESAULIJA, FADHILAH I. MANSYUR, ARMANSYAH K. RACHIM, KELIOPAS KREY, BEATRIX WANMA, REYNOLD KESAULIJA, DINOSIUS SIMANJORANG, FIKTOR SIMBIAK	3884-3898
Structural stability analysis of rain trees (Samanea saman) subjected to dead, live, and wind loads combination SITI CHUROTUL AINI, ULFA ADZKIA, EFFENDI TRI BAHTIAR, M. MIFTAH RAHMAN, AGUS BUONO, LINA KARLINASARI	3999-3908
The effect of planting distance engineering treatment on the morphophysiology and yield of soybean varieties integrated with oil palm WAGINO, ABDUL RAUF, CHAIRANI HANUM, RAHMANTA	3909-3919

Local and landscape effects on the abundance and diversity of soil arthropods in citrus orchards of Malang and Batu, East Java, Indonesia ITO FERNANDO, FAIZ NASHIRUDDIN MUHAMMAD, RAHMAT FURQONI, M. BAYU MARIO, RETNO DYAH PUSPITARINI, IRISA TRIANTI, MUHAMMAD AKHID SYIB'LI, AKHMAD RIZALI	3920-3927
Diversity, bioactivity, and phytochemistry of endophytic fungi in various organs of nipa palm ( <i>Nypa fruticans</i> ) mangrove SAKINAH SALMAN AHMAD NASUTION, ELFITA, HARY WIDJAJANTI, FERLINAHAYATI	3928-3942
Screening of <i>Lactobacillus</i> from Noi chicken gut as potential probiotics against poultry pathogens NGUYEN PHUONG THUY, NGUYEN NGOC TRAI	3943-3952
Phenotype variability of <i>Pometia pinnata</i> from Riau, Indonesia based on qualitative characters ZULFAHMI, ROSMAINA	3953-3964
Phylogenetic relationship of local rice from Central Java, Indonesia with pokkali variety based on Single Nucleotide Polymorphism (SNP) markers  QORI NUR FAUZIAH, EDI PURWANTO, MUJI RAHAYU	3965-3973
Response of transgenic tobacco with P5CS gene expression to polyethylene glycol- induced drought stress AHMAD RIDUAN, DJOKO SANTOSO, SUDARSONO	3974-3984
Evaluation of growth and yield potential of three varieties of chili pepper ( <i>Capsicum frutescens</i> ) intercropped with maize ( <i>Zea mays</i> ) at different planting times I MADE SATRIA DWI ARTA, MUHAMAD ACHMAD CHOZIN, ARYA WIDURA RITONGA,	3985-3994
Short Communication: First report on the occurrence of microplastic contamination in mariculture <i>Eucheuma cottonii</i> from Lancang Island, Kepulauan Seribu National Park, Jakarta, Indonesia MBARA CHAM, YASMAN YASMAN	3995-3999
Species diversity and the spread of invasive fish in the Upper Bengawan Solo River, Central Java, Indonesia MUHAMMAD RAHARDIAN ADILA HAQQI, DAMAYANTI MIFTACHUS SHOLICHAH, MUHAMMAD FADHILLAH ARMANDO, MUHAMMAD FAJAR SANI, MUHAMMAD KUKUH APRIANTO, CHEE KONG YAP, MUH. SULAIMAN DADIONO, AHMAD DWI SETYAWAN	4000-4010
