GUIDE FOR AUTHORS

Aims and Scope
Asian Journal of Natural Product Biochemistry (Asian J Nat Prod Biochem) (formerly Biofarmsis) encourages submission of manuscripts dealing with original contributions to the following areas: (i) natural product chemistry to the biochemical properties and biological activities of bioactive components of land and sea, and of plants, microbes and animals; (ii) activities of antimicrobial, antiviral, antiparasite, ant-cancer, etc.; (iii) natural products and their derivatives in the context of structure elucidation, and development of drugs and pharmaceutical formulations and evaluation; as well as biochemistry, chemistry, biotechnology, physiology, cell structures, pharmacology, toxicology, and chemical ecology of natural products.

Submission and Review
Manuscripts are submitted electronically to https://biodiversitas.mipa.uns.ac.id/D/template.doc or in the manuscript. All names.

Submission:
The journal only accepts online submissions through the open journal system. For further information, please refer to the Reference (https://doi.org). For more information, please email the editors at unsjournals@gmail.com (or editors@smajo.id). Submitted manuscripts should be the original works of the author(s). Please ensure that the manuscript is submitted using the template, which can be downloaded from https://biodiversitas.mipa.uns.ac.id/D/template.doc. The manuscript must be accompanied by a cover letter containing the article title, the first name and last name of all the authors, and a paragraph describing the claimed novelty of the findings versus current knowledge. Please also provide a list of potential reviewers in your cover letter. They should come from outside your institution and better from different countries. Submission of a manuscript implies the submitted work has not been published (except as part of a thesis or report, or abstract) and is not being considered for publication elsewhere. When a group writes a manuscript, all authors should read and approve the final version of the submitted manuscript and its revision; and agree on the submission of manuscripts for this journal. All authors should have made substantial contributions to the conception and design of the data and its analysis, drafting the manuscript, and correcting the revision. All authors must be responsible for the work’s quality, accuracy, and ethics.

Ethics
Author(s) must be obedient to the law and/or ethics in treating the object, research, and to an attention to the legality of material sources and intellectual property rights.

Copyright
If the manuscript is accepted for publication, the author(s) still hold the copyright. All manuscripts will be published in electronic version (DOAJ). Authors are encouraged to retain their copyright, but may also use their work for purposes, such as academic presentations and publication of summaries or abstracts, provided that they cite the original publication. Revised/manuscripts are limited to 8,000 words (excluding tables and figures) or proportional to articles in the previous edition. The abstract should not be more than three-quarters of the entire page. Reviewer articles are also limited to 8,000 words, while Short communications may be less than 2,500 words, except for pre-study (can be more).

Acceptance
Only articles written in US English are accepted for publication. Manuscripts will be reviewed by editors and invited reviewers (doctors). The editor reserves the right to alter, but not change, a manuscript to their discretion. An author(s) will be notified of acceptance, rejection, or need for revision within 1 to 2 months of receipt. Manuscripts will be rejected if the content does not align with the journal’s scope or does not meet the standards of quality, is an inappropriate format or contains complicated grammar, dishonesty (i.e., plagiarism, duplicate publications, fabrication of data, citations manipulation, etc.), or ignoring correspondence in three months. The primary criteria for publication are scientific value, interest, and accuracy. Unpublished works will be referred to a corresponding author by email or doc. or.doc files for checking and correcting typographical errors. The corrected proofs should be returned in 7 days to avoid publication delays. The accepted papers will be published online in color, free of charge. Authors must pay for the printing charges but the hardcopy is included in the word “copyright.” Manuscript preparation
Manuscript preparation
Manuscript is typed on A4 (210x297 mm) paper size. A separate title page is not required, and the references are listed at the end of the manuscript. The title of the article should be written in clear, compact, and informative sentences, preferably not more than 20 words. Name of author(s) should be completely for the first and the last name. Name and institution address should also be completely written with street name and number (location), postal code, telephone number, facsimile number, and email address. The title of the abstract should be written in capital letters (e.g., “Nutritional Value of C. p wild.”). The International Association for Veg.

Introduction
About 600 words, covering the aims of the research and provide an adequate background, avoiding a detailed literature survey or a summary of the results. Materials and methods should focus on the procedures and data analysis. Results and Discussion should be written as a series of connecting sentences, however, for a manuscript with a long discussion, it should be divided into subitles. Discussion should be expressed in a brief; all sources of institutional, private, and corporate financial support for the work must be fully acknowledged, and any potential conflicts of interest are noted.

Acknowledgements
A concise abstract is required (about 200 words). The abstract should be informative and state briefly the aim of the research, the principal results and major conclusions. An abstract is often presented separately from the article, thus it must be able to stand alone (completely self-contained); it should be cited, reviewed, and inserted into the article immediately after the first mention. Abbreviations should be avoided, but if essential, they must be defined at their first mention. Keywords are about five words, covering scientific and local name (if any), research themes, and special methodologies used. All abbreviations must be defined at their first mention there. Running title is about five words.
