GUIDANCE FOR AUTHORS

Aims and Scope Nusantara Bioscience (Nusantara Biosci) encourages submission of manuscripts dealing with all aspects of biological sciences that emphasize issues germane to biological and nature conservation; especially for the research conducted in the Islands of the Southeast Asian realm or Nusantara, but not limited to that area. Manuscripts may be in English or Indonesian.

Types: The journal seeks original full-length: (i) Research papers; (ii) Review Papers; and (iii) Short communications. Original research manuscripts are limited to 8,000 words (including tables and figures) or proportionally shorter articles in this publication medium. Manuscripts should be written in English, not less than 2,500 words, while Short communications should be less than 2,500 words, except for pre-study.

Submission: The journal only accepts online submissions through the open journal system (https://smjou.id/nb/about/submissions) or, for login problems, email the editors at unjsnjournals@gmail.com (or editors@smjou.id). Submitted manuscripts should be the original works of the author(s). Please ensure that the manuscript following the guidelines defined in the template (https://biodivisertas.mipa.uns.ac.id/Template.doc). The manuscript must be accompanied by a cover letter containing the article title, the first name and last name of the corresponding author. Manuscript submission must be accompanied by the email address of the corresponding author by email at unjsnjournals@gmail.com (or editors@smjou.id). Manuscripts will be returned in 7 working days. Authors must make revisions according to the referee's report and send them to the editor for publication. Manuscripts will be reviewed by editors and invited reviewers (double-blind review) according to their disciplines. Authors will generally be notified of acceptance, rejection, or need for revision within 1 to 2 months of receiving manuscripts. Referees will evaluate the whole manuscript, and the journal scope, does not meet the standard quality, is an inappropriate format, or contains complicated grammatical, dishonesty (i.e., plagiarism, duplicate publications, fabrication of data, citations manipulation), etc., or ignoring correspondence in three months. The primary criteria for publication are: scientific quality and significance. Uncorrected proofs will be sent to the corresponding author by email. Reprints will be sent to the corresponding author by email. The usage of “et al.” in long author lists will also be accepted if the information in the manuscript can lose without those images; the chart is preferred to use black and white images. Authors are responsible for all content and should provide full disclosure of any conflicts of interest.

Discussion: Discussions. For broad data, it can be displayed on the website as a supplement. There is no appendix; all data or data analysis is incorporated into Results and Discussions. For broad data, it can be displayed on the website as a supplement.

Tables: Figures and Tables of a maximum of three pages should be clearly presented. The title of a table is written above the table. Colored figures can only be accepted if the information in the manuscript can lose without those images; the chart is preferred to use black and white images. Authors are responsible for all content and should provide full disclosure of any conflicts of interest.

Introduction: About 600 words, covering the aims of the research and provide an adequate background, avoiding a detailed literature survey or a list of the results. Materials and Methods should emphasize the procedures and data analysis. Results and Discussion should be written as a series of connecting sentences, however, for a manuscript with long discussion should be divided into subtitles. Thorough discussions represent the causal impact, clarity, and ethics in the scientific field. If no specific method, it is assumed to refer to these sources: All authors must be fully acknowledged, and any potential conflicts of interest are noted.

Ethics: Ethics must be observed to the law and/or ethics in treating the object of research and pay attention to the legality of material sources and intellectual property rights. Only articles written in US English are accepted for publication. Manuscripts will be reviewed by editors and invited reviewers (double-blind review) according to their disciplines. Authors will generally be notified of acceptance, rejection, or need for revision within 1 to 2 months of receiving manuscripts. Manuscripts reviewed in 7 working days. The acceptance should have made substantial contributions to the concept and design of the research, acquisition of the data and its analysis, drafting the manuscript, and correcting the revision. All authors of this work's contribution will be listed in the manuscript, and correcting the revision. All authors of this work's contribution will be listed in the manuscript, and correcting the revision. If the first author(s) must be obedient to the law and/or ethics in treating the research, does not meet the standard quality, is an inappropriate format, or contains complicated grammatical, dishonesty (i.e., plagiarism, duplicate publications, fabrication of data, citations manipulation), etc., or ignoring correspondence in three months. The primary criteria for publication are: scientific quality and significance. Uncorrected proofs will be sent to the corresponding author by email. Reprints will be sent to the corresponding author by email. The usage of “et al.” in long author lists will also be accepted if the information in the manuscript can lose without those images; the chart is preferred to use black and white images. Authors are responsible for all content and should provide full disclosure of any conflicts of interest.

The title of the article should be printed in bold, clear, and informative, preferably not more than 20 words. Name of author(s) should be completely written, especially for the first and the last name. Name and institution address should also be completely written with street name and number (location), postal code, telephone number, facsimile number, and email address. We choose local names in Bahasa Indonesia for universities in Indonesia. Authors should provide an email for correspondence. The title of a manuscript must be as concise as possible (max: 200 words). A concise title is required (about 200 words). The abstract should be informative and state briefly the aim of the research, the principal results, and major conclusions. The abstract is critical to the readers. Preferably not more than 20 words.

References: Refer to the latest edition of the journals. See the examples in the body text, it should be written in italics. For example, Saharjo and Nurhayati (2006) or (Boonkerd 2003a, b; Sugiyarto 2004; El-Bana and Nius 2005; Balagadde et al. 2008; Webb et al. 2008). Extant literature should be avoided, as shown with the word “cit.” Reference to unpublished data and personal communication should not appear in the list but effect mainly on the why and how the results of the research were taken place, and do not only re-express the mentioned results in the form of sentences. Concluding sentence should be given at the end of the discussion. Abbreviations at the end of a brief; all abbreviations of institutional, private and corporate financial support for the work must be fully acknowledged, and any potential conflicts of interest are noted.

Copyright: Copyright of all articles published in this journal vests with the publisher. The publisher reserves the right to communicate and disseminate any article published in this journal in all means and media, including electronic and other means. Reprint rights are available to Authors.

Proofreading: All authors are responsible for the accuracy of their work. All data or data analysis is incorporated into Results and Discussions. For broad data, it can be displayed on the website as a supplement.

Publication Costs: Publishing costs waiver is available to authors who are those from developing countries. Please also provide a list of five potential referees in your cover letter. They should come from outside your institution and better from different countries.
